HTML

JavaScript

JavaScript in button element #1

```
<button onclick="alert('Hello')">
  Please Click
</button>
```

JavaScript in button element #2

```
<button onclick="console.log('Hi')">
  Please Click
</button>
```

JavaScript in button element #3

```
<button
  onclick="document.getElementById('demo').innerText=Date()"
>
  Please Click
</button>
```

JavaScript in <script> tag

```
<script>
  alert(“Hello”);
</script>
```

JavaScript from external *.js file

```
<script src="script.js"></script>
```

Inside head tag

```
<head>
    <meta charset="UTF-8">
    <title>My Web Page</title>
    <!-- Link your JS file here -->
    <script src="script.js" defer></script>
</head>
```

the defer attribute prevents the script from blocking the page load and ensures it runs only after the full HTML has downloaded

Before closing body tag

```
<body>
    <h1>Hello World</h1>
    <script src="script.js"></script>
</body>
```

JavaScript from external *.js file

```
<script src="script.js"></script>

<script src="js/script.js"></script>

<script src="https://example.com"></script>
```
